F40 Office building

Friedrichstrasse 40 10969 Berlin

PETERSEN ARCHITEKTEN

© Jan Bitter . Pubblicata il 09 Giugno 2011.

The parcel of Friedrichstrasse 40 is located in the southern Friedrichsvorstadt. A place inhabited over the years by man of letters and artists which interfuses with the cultural development of its environment. The parcel was first built with a 2-storey house, later on with a multi-storey house, densely occupying the parcel within a front and back building. Here lived the brothers Skadamowski, considered as the inventors of the 3D eyeglasses and the cinematics in Germany. The cultural coinage, the north – between Koch and Leipziger road – adjacent area of the shopping mile Friedrichstrasse and beyond the Leipziger provided in the past a high level of visitor. The former border inspection point „checkpoint Charlie“ highlights the past history. It is not far and well visible from the Friedrichstrasse 40.
